VOLUME III — No. 21

CROSSFIELD, ALBERTA — FRIDAY, JUNE 29th, 1945

\$1.50 a Year

DANCE WELL ATTENDED

The dance at East Community Hall, the first sponsored by the new directors well attended. All monies collected at this hall is used for the upkeep and besides contributions are made to various benevolent and social organizations of the community. The directors hope to be able to lay a new hard wood floor in the hall in the very near future.

The next Dance with a camp fire, weiner roast and extra trimmings and old time music promises to be the highlight of their summer program.

Sundre Farmer Commits Suicide

August Chemell, a farmer for the past 19 years in the Sundre district was found lying in his yard, 1 1/2 miles north-east of Sundre, by a neighbor with a bullet through his head. The wound from a 30-rifle is believed to have caused instant death and was self-inflicted.

Cpl. D. Dunlop of the R.C.M.P. investigated and Dr. O. C. Hartman, coroner stated that no inquest would be held.

A note was found in which Chemell gave instructions as to the disposal of his property.
Chemell is survived by his wife who resides in Calgary, two sons, Harry in the armed forces overseas, and Albert, who is working on the farm of a neighbor, and one daughter, Mrs. Otto Wilson of Sundre.
Funeral services were held from the Father Funeral chapel on Wednesday afternoon. Interment was made in the Fairview cemetery.

LOCAL NEWS

Keep in mind the big hop in the East Community Hall on July 29.

A. W. Gordon was a business visitor in Olds on Wednesday morning.

Pong Hin of Lacombe was a business visitor in town on Wednesday.

Corp. Geo. Shuter is spending a 90 day military leave here.

Mr. and Mrs. George Bennie celebrated their thirtieth wedding anniversary on Thursday, June 21st.

BORN—To Mr. and Mrs. C. A. Laut on June 17th at the Casa Maria Hospital, Hamilton, Ont., a daughter.

Miss Helen Fleming of Calgary is spending a vacation with her parents, Mr. and Mrs. S. Fleming here.

Dept. examinations which are the order of the day now are being held at our local school.

Mrs. Edlund, Mary Karen and Mabel Lundeen were visitors to the city on Tuesday this week.

Drenching rains the last day or two will make quite a difference to the crop prospects throughout the district.

Mrs. E. T. Hanlon of Waterloo, Iowa, is visiting her sister, Mrs. N. A. Johnson.

Don't forget the Dance in the U.F.A. Hall on Saturday night.

Jack Ferguson of Tany Bryn has taken over the Barber Shop for the time being and is at your service.

Many from Crossfield plan to attend the Dominion Day Sports in Olds on Monday, July 2nd.

The Olds Raiders girls softball team will compete in the tournament at the Crossfield tournament on Saturday.

Now that we have had the million dollar rain, the Sports Day tomorrow (Saturday) should draw a record attendance.

We hear that our friend Everett Ellis has bought an out burner which he intends to send out for the money at the Calgary Fair race meet.

Miss June Patmore of Calgary and Crossfield is spending a holiday with her grandparents, Mr. and Mrs. Geo. Patmore in Olds.

Village Taxpayers are Warned that Saturday next June 30th is the last day on which the 10 percent discount will be allowed.

Mr. and Mrs. Louis Lennon of Calgary spent Sunday at the home of the former's parents, Mr. and Mrs. John Lennon.

Monday next being a holiday, the regular monthly meeting of the Village Council will be held on Tuesday evening.

J. G. Harrison recently purchased some two-year-old steers from Garnet Onell that averaged \$160.00 a head. It always pays to feed the good ones.

Owing to the holiday the next meeting of the Floral U. F. W. A. will be held on the second Wednesday, July 11th. Watch for special announcement.

C.W.A.C. Gladys Thompson who recently returned for overseas has been spending a furlough with her parents, Corp. and Mrs. Thompson, and has left for Calgary to resume her command at Currie.

Mr. and Mrs. Earl Devins and daughters Ethel and Audrey, leave on Saturday traveling by car to their new home at Wembley, the good wishes of the district are extended to them.

An added attraction to the Sports Day programme on Saturday, June 30th, will be a Horsehoe Pitching Tournament. Prizes will be given and entries should be made to Everett Ellis.

O/S Desmond Fitzpatrick, nephew of our Harry Fitzpatrick, spent a few days of his leave in town this week. Desmond is a member of the R.C.N. V.R. stationed at Halifax. He now intends to have a crack at the Japs.

Guy Moore of the Edmonton district was a visitor here last week-end and the forepart of this week. It will be remembered that Guy was formerly in the employ of the local U. F. A. Store in the hardware department.

Bill Stralo's swing bowling game in the local park is going over big, the attention around the big red, white and blue pole grows nightly. We hear of interested parties from outside points visiting the park and taking measurements of the layout and making inquiries as to the rules of the game.

"BOB HOPES" (From American Notes and Queries) Cockney children in the Covent Garden section of London named the German robot bombs "Bob Ope".

It was at first thought that there was some connection, in the children's minds, between the bombs and the American radio comedian. However, one boy explained the mystery much more simply: "We call them Bob Ope—bob down and ope for the best."

Carling Club And Board of Trade Discuss Community Centre

A meeting of the Crossfield Curling Club was held in the Bank of Commerce on Monday evening to hear the report of the committee to build a new rink. Under the chairmanship of President D. J. Hall, considerable discussion took place as to the desirability of amalgamating with the other organizations of the community to build a community building.

A committee of the Board of Trade was called in and they also placed the views before the meeting, with a suggestion that a community hall be built with the understanding that the first undertaking would be to establish the Curling Rink section as soon as money and material were available. This idea was taken up most enthusiastically by those present and a special meeting of the membership of the Curling Club was called for Friday evening to consider this proposal.

It has been suggested that this Community Centre would take the form of a War Memorial, and it would be an everlasting memorial to those who have given their all; also would show the appreciation of the community to the young folks who come back, for they undertook and have earned the right to have some place to gather.

SUMMER DANCE SCHEDULE FOR EAST COMMUNITY HALL PLANNED

On Sunday, June 17th, a meeting of the East Community Hall Board and Directors was held at the home of Mr. and Mrs. Orval Bells for the purpose of planning a summer schedule of dances. It is the objective of the committee to raise enough money to put on a dance in the Hall and make various other improvements.

The Tany-Bryn committee gave the new plans a flying start with their successful dance held on June 22nd. They expected to clear close to \$75.00. C'mon gang, let's keep it up.

SPORTS PROGRAM TO FEATURE DOMINION DAY CELEBRATIONS

Everything is in readiness for the Dominion Day Sports to be held in Crossfield tomorrow, Saturday, June 30th.

Night teams have entered the men's football tournament which would see some of the best in the province. There is also a girls softball tournament with the outstanding teams of the district.

A full line of track events for all ages.

An added feature is the horseshoe tournament.

The day will finish up with a grand dance in the U. F. A. hall at night. Be a booster, attend the Sports on Saturday.

Olds Owls Honor George Rear

The Owls Club of Olds, and outside members from Crossfield and Calgary, joined in honoring Mr. George Rear, the owlst Owl. The meeting was in the hands of Chief Hooting Owl Archie Boyce, ably assisted by Owls S. W. Miller and "Shorty" Hendrickson. For the banquet there were 37 chickens fried to a king's taste, and ten watermelons just out of the refrigerator.

During the course of the evening's entertainment, Owl S. W. Miller, in the absence of Recording Owl "Mac" Miller, read the minutes of the last meeting. These were the subject of much discussion before being adopted.

Owl Rear was presented with two gifts, both very useful. We expect to see George any day now, his pockets bulging with that new pocketbook. The meeting adjourned until the next session to be held at a date to be announced. Some Owls were still unable to open their eyes the next day.

This successful Owls' meeting was moved from its previous meeting place in the Elks' Hall to the Community Club House on the outskirts of town.

Attempted Robbery At Olds Foiled

James Clarke, employed by the Imperial Store, was foiled in his attempt to steal cigarettes from Maybank's Drug Store, Olds, on Monday. Clarke, who was in company of another man, was seen by a clerk turning from the Red Deer stampede. The party parked their car on Main Street, and Clarke boldly entered the drug store and proceeded to the basement. Here he filled a cardboard container with cigarettes and was leaving by the back door when apprehended by Ralph Maybank.

Clarke was taken into custody by the local R.C.M.P., and while Constable Jones and Corporal Dunlap were otherwise engaged, Clarke attempted to escape, and after a heated chase down the alley and through Billy Schoobert's barber shop, he was again taken into custody.

Appearing before the Magistrate at Didsbury, Clarke was fined \$45.

RECENT BRIDE HONORED AT SHOWER

Complimenting Miss Ruth Richardson, whose marriage to Mr. Willis Teskey of Rocky Mountain House will take place this Thursday, June 29th, several of the neighbor ladies entertained at a miscellaneous shower at the home of Mrs. Neil Laut on Wednesday, June 28th. A lovely variety of gifts from the 39 guests were presented to the bride-elect in a smartly decorated imitation of an Imperial Oil drum.

A jolly contest was won by Mrs. Vera Schofield who described most fittingly, her "ideal man". A delicious lunch was served by the hostesses.

Out-of-town guests were Mrs. Teskey and Mrs. Good, mother and sister of the groom.

Weeping love grass, a hardy quick-growing plant imported from South Africa, is being used successfully in Oklahoma on depleted soils and in soil erosion prevention; one pound of its fine seed will plant four acres.

Two of Bing Crosby's sons were introduced to Frank Sinatra. One of the boys said, "We'd love to see your leebaw." Sinatra asked why, and the boy explained: "Well, dad says you took the bread and butter from us." "Yes," said his brother, "and you don't look as if you had any of it yourself."

"ONE MILLION B. C."

Starring: Victor Mature — Carol Landis Len Chaney, Junior
With added Shorts and News Reel.
Showing in the Crossfield U.F.A. Hall on
Wednesday, July 4th.
At 8 p.m.

CIGARETTE PAPERS

DOUBLE AUTOMATIC BOOKLET

Each For All

IN HIS MESSAGE TO THE MEN of the First Canadian Army on V-E Day, General Crerar said in part: "Each for all" has been the guiding principle of the Canadian army in battle. That same principle is the essential one to which we must adhere if we are to assure the life and growth of democratic government in the world—that community system which has been so eloquently described by Abraham Lincoln as "government of the people, by the people, for the people." "Soldiers of Canada have worked to it in war. Citizens of Canada can do no less in peace." Although this message was directed to the troops, all Canadians would do well to consider the thoughts expressed there, and to reflect on how the application of that guiding principle, "each for all" might be used to bring about peacetime achievements comparable to those made by our men who fought so splendidly in Europe.

A New Chapter In Our History

When members of the armed forces return to civilian life, and our war industries are converted to peacetime production, we shall be commencing a new chapter in the history of this country. Many young men and women, coming out of the services will be entering business or professional life for the first time, and they will also, for the first time, assume the responsibilities of citizenship under peacetime conditions. Others, who were established in their work before the war, will return with a new outlook on many problems. The magnificent record of the Canadians on the fighting fronts has demonstrated their capacity for accomplishing great things. At home, our resources have been organized to give support to the armed forces, and there have been outstanding achievements in connection with production, scientific developments and many other matters. In all this we have worked to preserve our own freedom, and that of the other Allied countries. We must realize that the same energy, interest and co-operation will be needed if our future is to be secure.

People Should Use Franchise

The principle "each for all" has many applications to the conduct of affairs in time of peace. In a democracy the government reflects the will of the people. In Canada, there is every opportunity for the people to elect the government they prefer, and through that government, to determine the domestic and foreign policy. Statistics show, however, that on too many occasions large numbers of the people fail to register their votes in municipal, provincial and federal elections. If there is to be true democracy here, and if each citizen is to assume his or her full responsibility, we must begin by taking a deep interest in public affairs and by exercising our franchise at every opportunity. There are other domestic problems, including public health, education and unemployment which could profitably be approached from this point of view of "each for all". It has its application also, to racial and religious tolerance both at home and abroad. Great possibilities lie ahead, but the responsibility for developing them lies with the people.

SMILE AWHILE

Sign in the window of a West Coast beauty salon: "Don't whistle at the girls when they leave this Salon. One of them may be your grandmother."

"What did the calf say to the slo?"
"I don't know."
"Is my fodder in there?"

Jones: "Heaven bless him! He showed confidence in me when the clouds were dark and threatening."
Robinson: "In what way?"
"He lent me an umbrella."

Professor: "What is the most potent poison?"
Student: "An airplane; one drop and you're dead."

June: "Who was that man I saw kissing you in the hotel foyer?"
Julie: "I couldn't just place him at the time, but he seemed to know me pretty well."

Murphy: "Can you get any distance on your wireless?"
Jones: "Well I've had complaints from people living three streets away."

"Your vacation doesn't seem to bother you."
"No; my boss tells me when and my wife where."

Mr. Faraway: I was going to call you up last evening, but I forgot your telephone number.
Prof. Letherbink: It is 742. You can remember it easily by associating it with the year of Charlemagne's birth.

Dodd: I notice that in telling about that fish you caught you vary the size for different listeners.
Rodd: Yes, I never tell a man more than I think he'll believe.

A girl, filling out a form before going to college, came to the question: "What is your denominational preference?"
She wrote: "I like to be called Betty."

THE QUAKER OATS COMPANY OF CANADA LIMITED

Price Control And Rationing Information

Q.—Has the restriction been removed on trucks which limited trucks to a travelling distance of 30 miles from their home address?
A.—The 30-mile limit on the operation of trucks has been removed. Restrictions also have been removed on wholesalers and retail deliveries, pickups and deliveries by laundries and dry cleaners, and the use of vehicles by theatres for advertising purposes. Each retailer may now establish his own value limitation on deliveries.

Q.—Has rim fire ammunition been removed from the rationing controls?
A.—Rim fire ammunition may now be purchased without a permit from the War Relocation and Trade Board. The rim fire ammunition consists almost entirely of 22 calibre cartridges, though small quantities of 25 and 32 calibre rim fire ammunition are produced and these are also removed from the ration list.

Q.—What is the coupon value for maple syrup?
A.—Until May 31st each preserves coupons was good for 40 fluid ounces of maple syrup. Starting June 1st coupon value for maple syrup returns to its former value of 24 fluid ounces.

Q.—May civilians now purchase air force and naval officers shirts?
A.—Yes, civilians may now purchase shirts which were previously sold only to officers of the armed services.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Dame Of Sark

Peasants Carried On Under Five Years Of German Occupation

The tiny island of Sark and its population of 360 peasants remained, during five years of German occupation, under the benevolent feudal rule of the 60-year-old Dame of Sark.

Liberated British forces expected to find that the garrison of some 300 Germans, led by an ardent Nazi captain, had ravaged the island. Instead, they learned that the shrewdly Dame of Sark had kept her charges almost completely free of interference by the Germans.

The Dame, who is "Madame" to the reverent islanders, operates her island efficiently and democratically under the old English feudal system. Her grant to the island dates back to the time of Queen Elizabeth, who gave it to a Jersey man, Helier De Carteret.

Weather Causes

Has Now Become A Science, So That We Can Predict Changes

By understanding the causes of weather and its actions we have learned to adjust ourselves to its moods. Now we can predict what will happen and when it will come. Frost, rain, wind and flood are foreseen and the necessary defences made. The orange-grower is warned of frost, and he makes ready his smudge pots to blanket the groves with smoke. Airplanes are despatched only when weather is favorable along the route. We have always had the weather with us, but now it is a science and meteorology has become big business—Calgary Herald.

Report Gratifying

German Respected Cemeteries And Memorials In France And Belgium

Sir Fabian Ware and his colleagues of the Imperial War Graves Commission are able to give a gratifying account of the state of its cemeteries and memorials in France and Belgium after the German occupation. They were respected by the enemy and, thanks also to the care of the French and Belgian authorities, can soon be restored. One cemetery at Cologne is also found to be in good condition. All this greatly lightens the work of repair and will hasten the work of making new cemeteries for the dead of this war, the commission's latest charge. It is a melancholy task performed with reverence and attention to architectural and horticultural beauty, and some of our best architects contribute to making these memorials worthy of our fallen. Happily the commission has not been stinted of funds; the governments of the commonwealth have contributed in proportion and there is no fear that the memorials will fall into neglect—Manchester Guardian.

MEET A CWAC—

"Someone has to stay at home, I guess," says Pte. Emma Allriess, Togo, Sask. Emma, one of a family of six service members, all of them in khaki, is the only one still in Canada. One of her brothers was taken prisoner at Hong Kong, three others served on the Western Front as did also their sister, Alice, one of a company of CWACs in Belgium. Emma is extremely proud of her brothers and sisters. Of course she'd like to be over there with them, but as long as she can't, she is determined to do a bang-up job of "carrying" in Canada. Emma enlisted in the CWAC in December, 1942. She received her basic training at Vermilion, a clerk's course in Edmonton and since that time has been posted in Regina. Very fond of any sports, her chief hobby, however, is fancy work. Reading, music and nature study come high on her list of "things I like to study and do".

PROMOTED—

Pte. Joyce Hilda Wick, Kerrobert, Sask., has recently been promoted to the rank of lance corporal at Camp Borden, Ont., where she is now stationed. L-Cpl. Wick enlisted at Winnipeg in February, 1943. Following her basic training at Vermilion, Alta., she was posted to Camp Borden, where she has been employed since.

GRADUATE—

Several Western girls were included in the latest clerks' course graduating class at No. 3 CWAC (B) T.C., at Kitchener, Ont. Among them were Ptes. E. J. Annand, Mossbank, Sask.; M. Blakert, Theodore, Sask.; O. E. Brady, McCreary, Man.; J. T. Czech, Raymond, Alta.; E. A. Bowman, Regina; C. E. Edwards, Taber, Alta.; M. E. Griffiths, Calgary; D. J. Harey, Yorkton, Sask.; N. E. Johns, Marmora, Man.; J. M. Low, Riverhurst, Man.; A. E. F. Chavis, Sask.; S. M. Hunt, Vancouver; L. Kirschman, Edmonton; and M. F. McLeith, Calgary.

YOU NEVER KNOW—

Cpl. Evelyn Watson, Belleville, Ont., started out to study cooking. She ended up in front of a camera. It all started when an Army photographer attended the cooking class to take some pictures for publicity purposes. When the negatives were developed one of the students was spotted as being a decidedly photogenic type. The "type" was identified as Corporal Evelyn Watson and she was promptly enrolled on the list of CWAC models, on call for special publicity purposes. Her first assignment was to pose for a colour photo to be reproduced as the cover of a popular magazine. A former switchboard operator, Cpl. Watson enlisted in May, 1943. On completion of basic training at Kitchener, Ont., she attended the army stenographic course at Ottawa and Toronto. She is now employed as clerk typist at the Dir. of Repatriation, N.D.H.Q.

SHELL SAY IT EVERY TIME—CWAC Question Mark: Are you signing up for the Pacific war?

Penelope CWAC: Yes, but I expect to fight it in Saskatchewan, same as I did the European.

Sun spots can be seen with the naked eye, if they're 17,000 square miles or more in area.

Nice Change for Saturday Supper

Easy to fix and smashing good!

ALL-BRAN SCRAPPLE
1 pound fresh pork sausage
2 cups water
14 teaspoon salt
14 teaspoon pepper
14 cup cornmeal
14 cup kielbasa
14 cup All-Bran

Brown sausage in frying pan; oil or butter. Bring water to boiling point; add seasonings. Stir in cornmeal; stir constantly until thick. Add All-Bran and sausage; mix well. Pour into wet loaf pan; chill until firm. Unmold; cut in half-inch slices; brown in sausage fat on hot griddle. Serve with syrup or apple butter.

You just haven't tasted scrapple until you've tried it made with Kellogg's All-Bran! These tasty golden-brown shreds give it more body... make it something to really sink your teeth into... and of course they add that heavenly nut-like flavour that only Kellogg's All-Bran can give. Clip the recipe now and try it on your table this Saturday. Get Kellogg's All-Bran today. 2 convenient sizes. Made by Kellogg, London, Canada. Helps keep you regular—naturally!

Kellogg's All-Bran

Model Tractor Made By Hand

This attractive farm tractor model was made entirely by hand by Sgt. A. E. Potter, R.C.A.F., 442 20th Ave. N.E., Calgary, Alberta, while stationed at an isolated post. Note its size as compared with the fountain pen. It is 14 inches long, 8 1/2 inches high and 3 1/2 inches wide. The tires are souvenir ash trays.

Record Hog Output

Major Increases Shown In Two Western Provinces

Of the record quantity of meat produced in Canada in 1944, Swift Canadian Co. Limited handled 16.2 per cent. J. H. Tapley, President, states in the company's annual report to employees just issued.

In 1944, Canadian pork production reached an all-time peak. Mr. Tapley pointed out. Total hog marketings across Canada jumped from 3,705,000 in 1939 to 8,563,000 in 1944, a rise of 142 per cent.

"Based on data published by the Dominion Bureau of Statistics and the Dominion Department of Agriculture, of total slaughtering of cattle, calves, hogs, sheep and lambs during the year 1944," said Mr. Tapley, "Swift Canadian Co. Limited, processed 16.2 per cent. of the total number of head of livestock slaughtered in Canada or on the basis total pounds of meat produced last year our company handled 16.2 per cent."

Mr. Tapley also announced that a total of \$26,000 in cash awards was received by 303 employees who had made acceptable suggestions under the Employees' Suggestion Plan.

He noted that 1,222 employees had gone into the armed services and recalled with regret that 34 of these had either been killed in action or died in service, five were missing in action and eight were prisoners of war.

"Our ability to meet the heavy wartime demand for food, and our achievement in handling record quantities at a time when many of our experienced employees are in the armed forces," said Mr. Tapley, "is a tribute to the efforts of all who remained behind at their jobs."

Bomb Campaign
Seven Thousand Guns Operated On Britain's East Coast

Seven thousand guns were arrayed on Britain's east coast when the second flying bomb campaign began in September, 1944, it was revealed. An official announcement said that the Germans launched 1,609 buzz bombs between Sept. 5 and the end of March, 1945. Anti-aircraft guns knocked down 407 and the R.A.F. claimed another 78. The Royal Navy was credited with 13 flying bombs.

There are 16 sound-equipped movie houses in ancient Palestine.

GEMS OF THOUGHT

PRAYER

Prayer is not overcoming God's reluctance; it is laying hold of His highest willingness—Trench.

Remember, whatever warrant you have for praying, you have the same warrant to believe your prayers will be answered—J. Phillips.

Are we benefited by praying? Yes, the desire which goes forth hungering after righteousness is blessed of our Father, and it does not return unto us void—Mary Baker Eddy.

Let not him who prays, suffer his tongue to outstrip his heart; nor presume to carry a message to the throne of grace, while that stays behind—South.

The prayer that begins with trustfulness, and passes on into waiting, with always and in thankfulness, triumph, and praise—A. MacLaren.

Who rises from prayer a better man, his prayer is answered—George Meredith.

FINE TRIBUTE

Mark Sullivan, In The New York Herald Tribune

Know, reader, that you have seen greatness in our time. When on your radio you heard Winston Churchill in his hour of victory you were listening to one of the authentic great in history.

It would be a pity to lack awareness of this, to suppose you must turn to Gibbon and Plutarch to find heroic characters and exalted drama, to fail to realize that before our living eyes is grandeur of action and stature of personality as great as any that history provides. It would be fenable indeed to use the superlative and say that Churchill's greatness is unexcelled. If only by the immensity of the arena in which he spoke and fought, Churchill's part in this world war reduces the classic figures of Rome and Greece to the relatively inconsequent stature of actors in drama of minor scope.

Part of Churchill's greatness was unique, the union in him of the door and the sayer, the gift of action with the gift of words. The combination is unusual, only rarely have men in high posts had at once the talent for responsibility and the talent for expressing themselves. Churchill will be quoted as long as Shakespeare. Within the scope of the subjects upon which both wrote, the man of action was not inferior to the poet.

Work Is Finished

Alberta Woman Was Driver On London Docks During War

Mrs. Elsie, Scott, Alberta ranch-owner who in 1940 went to England from Turner Valley to help in the war effort has come home after 4½ years' driving on London's docks.

"In 1940 I made a resolve that I would do my bit," she told a London reporter when she left her war work. "Within a few days I was in the Canadian Mechanized Transport Corps. Two months later I was in England and was assigned to the docks as a driver."

"Scottie," as she is known to her fellow-drivers, was on duty day and night during the blitz and "had a great time, despite the fact the M.T.C. depot is covered with shrapnel holes."

Her job was to drive an ambulance and a mobile canteen. She brought two souvenirs back to Alberta—the Port of London Authority's Certificate for Gallantry and a piece of silver inscribed with the good wishes of her colleagues.

Far Exceeds Hopes

But Discoverer Of Penicillin Warns Against Any Improper Use

Sir Alexander Fleming, discoverer of penicillin, has warned against "abuse" of the drug as a cure-all for ailments other than those for which it is now indicated.

Any such improper use, he said, might lead to a situation wherein classes of microbes that are now killed by the drug might develop a resistance to it.

Visiting the United States to observe the use of penicillin in hospitals, Sir Alexander told a press conference that the drug had "far exceeded" the hopes held for it when he discovered it in 1929, but it had been ineffective against such ailments as cancer, typhoid fever and tuberculosis.

Position Of Britain

A Shortage Of Food And Clothing Will Continue

Life has been exceedingly tough for British civilians throughout five years of war. It will be tougher as regards both food and clothing before it gets better because of continuing shortages. There would be more to eat and more to wear for the British if they curtailed the war effort against Japan, but that is not the policy of the British government.

With commendable altruism the British are making plans to get along without further clothing and other relief from the United States in order that needier European liberated peoples may receive the fullest possible measure of American assistance.

The British War Relief, which during the past five years has contributed \$50,000,000 to needy Britons, will terminate its activities October 1. By British request funds raised in the national war fund campaign next Autumn will be utilized for sufferers on the continent while the United Kingdom will care for its own needy without American assistance.—Minneapolis Star Journal.

May Impose Limit

British Club Considers Banning Speedy Golf Balls From Championships

A speed limit may be imposed on British golf balls. Those that do more than 170 m.p.m. may be barred from championships.

The Royal and Ancient Club are looking into scientific tests held during the past 20 years with a view to decisions upon a standard ball.

But since legislation limiting the weight of the golf ball has failed to restrict its speed it may be necessary to rule that balls used in championships and official tournaments must be tested for speed limit.

Tests will be done on the robot golfers installed at most factories where golf balls are made.—London Daily Mail.

No Longer Needed

Canteen Train Carried Food To Subway Shelters In London

London has said farewell to the "Bun Specials," the canteen trains which have been carrying refreshments to subway shelters every night for five years.

To many Londoners who have lived in the Tubes for almost the duration of the European war, the closing of these shelters was a somewhat sad occasion. Once the army of men, women and children who called these underground dormitories home numbered 170,000. It had dwindled to 800.

Now the last remnant has reluctantly departed, taking with them memories of wild nights when the Luftwaffe battered London, when V-bombs and rockets descended while life went on far below the streets.

LADY NELSON CARRIES MANY PATIENTS

In two years of service as Canada's senior hospital ship, the Lady Nelson, former Canadian National steamer, has sailed 136,497 miles and has carried 15,967 patients and repatriates returning from overseas.

Important Railway Appointments

E. H. GURTON

E. H. Gurton, Winnipeg, western superintendent, Colonization and Agriculture Department, Canadian National Railways, has been appointed European Commissioner, London, England. D. M. Johnson, former European Commissioner, becomes eastern superintendent at Montreal. T. P. Devlin, assistant director of the department, with the same title, will be in charge of the western region. These important changes were announced in Montreal by J. B. McGowan, director of the department.

Born and educated in London, England, Edward Henry Gurton came to Canada in 1903, and for a number of years was engaged in farming in the west, later becoming editor of the Dauphin, Manitoba, Press. He entered the service of the Canadian National Railways in 1923 as a clerk in the Land Department at Winnipeg, and, transferring to the colonization department, progressed from chief clerk to assistant to western manager, eastern superintendent, Montreal, and in 1927, he was appointed manager, land settlement and development, St. Paul, Minn. He became western superintendent at Winnipeg in 1939.

Daniel Macfie Johnson, B.S.A. (Toronto), was born at Headingley, Manitoba, and was educated at York University College, Toronto; Wycliffe College, Stonhouse, Gloucester, England, and Ontario Agricultural College, Guelph, Ontario. After farming for seven years, he entered the department of agriculture of the Dominion Government in 1915. In 1923, he joined the Canadian National Railways, serving progressively as agricultural agent, Winnipeg; general agricultural agent and western manager. He was appointed European Commissioner at London, England, in 1927.

D. M. JOHNSON

A native of Larga, Ayrshire, Scotland, Thomas Parker Devlin moved to Canada in 1916 to become a farmer in the west. He attended the School of Agriculture, Olds, Alberta, and the University of Alberta, from which he graduated in 1925 with a B.Sc. (Agriculture) degree. After serving as livestock editor of the New-West Farmer, Winnipeg, he joined the Canadian National Railways, and was successively agricultural agent, District Superintendent, Saskatoon, and Superintendent of Farm Employment, Winnipeg. He was named western superintendent in 1936. Mr. Devlin was winner of the Dominion Individual Livestock Judging championship at the Canadian Inter-University Competition at Toronto, in 1925, and was top Canadian contestant at Chicago International Exhibition the same year.

T. P. DEVLIN

pean Commissioner at London, England, in 1927.

A native of Larga, Ayrshire, Scotland, Thomas Parker Devlin moved to Canada in 1916 to become a farmer in the west. He attended the School of Agriculture, Olds, Alberta, and the University of Alberta, from which he graduated in 1925 with a B.Sc. (Agriculture) degree. After serving as livestock editor of the New-West Farmer, Winnipeg, he joined the Canadian National Railways, and was successively agricultural agent, District Superintendent, Saskatoon, and Superintendent of Farm Employment, Winnipeg. He was named western superintendent in 1936. Mr. Devlin was winner of the Dominion Individual Livestock Judging championship at the Canadian Inter-University Competition at Toronto, in 1925, and was top Canadian contestant at Chicago International Exhibition the same year.

No Corner Pieces

But Rhubarb Pie Just As Tasty In Round Tin

The Fort William Times-Journal says: Rhubarb is a vegetable but it has all the characteristics of a fruit as far as eating goes. It is juicy, it is refreshing and it has a distinctive and appetizing flavor.

Rhubarb pies nowadays all are baked in round tins. There are no corner pieces. In other days many of the pie-tins were oblong and the corner pieces were favorites for hungry boys, for they had more of the delectable crust and were especially tasty when covered with rich country cream.

Aw shucks! Let us go out and see if we can corner a piece of rhubarb pie.

The First Necessity

Germany's Future Depends On People Facing Truth About Present

On the emergence in Germany of men and women of the highest moral courage, who can expose the falsity of the odious creed that has been propagated by force during the past twelve years, and teach their people honest thinking and reliance upon themselves, not upon a defunct autocrat, to work out their own salvation, depends the only hope of an honorable future for Germany. The first necessity is to face, without self-deception, the hideous truth about the present.—London Times.

STORED SHIPS FOR U.K.

By arrangement with the Ministry of War Transport of the United Kingdom, the purchases and stores department of the Canadian National Railways handled, since 1942, the storing of all vessels constructed and delivered by Canadian shipbuilders before they sailed on their maiden voyages. This storing consisted of the purchase and delivery on board the ships of their necessary deck, engine-room and commissary stores. The number of vessels thus furnished was 345.

INVENTED BY RUSSIAN

Paul Jabochkov, a Russian officer, invented the arc lamp in 1876. It consisted of two rods of carbon placed parallel and separated by an insulating material.

Great Understanding

General Eisenhower Would Not Tolerate Professional Or National Jealousy

General Dwight Eisenhower has displayed supreme qualities in this war, not only of profound military insight and strategic imagination, but also of political and psychological understanding, comments a London correspondent. Never was there a high commander who courted the lineal tolerance of the less for himself or was more prompt in giving the greatest credit to his military subordinates. Eisenhower's was the controlling brain that approved the victory plan worked out so efficiently by his combined staff, and his incredible energy has overcome tremendous problems with a promptitude that gave the invading Allied armies the momentum that knocked the German defence plan to pieces. But above all it has been Eisenhower's indefatigable tact that kept the Allied staffs together as a splendid and harmonious team. He refused to tolerate the least symptom of professional or national jealousy. Anyone guilty of that received his marching orders on the spot. On one occasion, soon after Eisenhower came to London to prepare his plans for D-Day, a heated altercation occurred between an American and British officer of rank. Eisenhower called the American to his headquarters and told him he did not blame him for losing his temper or for swearing, but added: "You applied the word 'limy' to your opponent. For that I send you home!"

Opinions Differ

As To Whether A Black Cat Will Bring You Luck

An American air officer has brought back to his home in New Jersey from the Far East a black cat because he believed it saved his life. When he was hiding in a barn beneath some hay, Japs entered in search of him, but the cat knocked over some bottles and diverted their attention.

There seems to be a difference of opinion about black cats. Some people regard them as lucky omens, unless the cat happens to walk across their path, in which case that is regarded as a bad sign. Why there should be any superstition about black cats, or any color cat, we do not know. But black ones appear to be both in favor and out-of-favor. The ancient Egyptians looked upon all cats as sacred, much in the same way that Hindus respect the cow. The anti-black cat idea is said to have its origin in the fact that witches are always depicted with black cats, hence they are associated with the powers of evil.—St. Thomas Times-Journal.

MANY SHIPS NEEDED

Three times as many ships will be needed to bring against Japan as great a weight of man power and equipment as was concentrated in Europe, Frank J. Taylor, president of the American Merchant Marine Institute, said in New York. Taylor, who represented the shipping industry, was one of the speakers at the New York ceremony in observance of National Maritime Day.

Henry VIII's fifth wife, Katharine Howard, introduced pins from France into England.

BACK IN NORWAY

King Haakon Is Home After Long Rule-In-Exile

King Haakon left London for Norway June 5 ending five years of rule-in-exile after German occupation of his kingdom.

The monarch arrived in Oslo aboard a British warship June 7, the fifth anniversary of his departure for Britain and the 40th anniversary of Norway's complete break from Sweden.

King Haakon, born Prince Carl of Denmark and chosen in 1905 by the Norwegian people in a plebiscite to be their monarch, escaped to Britain after constant German attempts to kill him by bombing.

The first bombing attempt on his life followed his scornful rejection of Quisling representatives' entreaties that he return to Oslo. The Germans levelled the village of Byggesund but the King and his government escaped.

German bombers followed him constantly all the way to Tromsø in the far north.

While he was there the Germans invaded the Lowlands and the collapse of Belgium and Holland Dunkerque followed. With the Norwegian military situation hopeless, Britain invited King Haakon to continue the fight from Britain.

King Haakon was a formidable foe even in exile. A huge Norwegian merchant fleet went to work for the Allies and hundreds of Norwegian soldiers and airmen slipped away to Britain to continue the battle. In Norway, underground forces carried on a bitter, unrelenting warfare.

Did Thorough Job

Nazis Sent University Professors To Rob Russia's Science Museums

An plunderer the Germans must excite the envy of the predatory of all lands. With a broad impartiality they lifted art galleries and gramophones, railroads and baby cars. Half the people of the Rhineland, correspondents tell us, ride bicycles stolen from the French, the Belgians, the Dutch and the Danes.

The thieves wasn't left entirely to hoodlums. To rob the science museums of Russia the Nazis sent university professors. One bit of loot these experts carried off was the only complete mammoth elephant skeleton in the world. Another was a herbarium of 106,000 plants, representing the flora of the Ukraine, collected by Russian botanists over a period of more than a century. In larceny, as in every other ugly war undertaking, the "master race" did its work with true German thoroughness.—New York Times.

Invents New Gadget

German Claims Machine Gun Can Be Fired Around Corners

Col. Hans Joachim Schadee surprised the American troops guarding his prisoner cage in Pilsen, Czechoslovakia, when he told them he had invented a machine-gun which could be fired around corners. Schadee, well-known industrialist, said he had invented "an attachment for the German 44 machine-gun which, with a special telescopic arrangement, made it possible to fire a bullet in a 30 degree arc."

DIRECTING BATTLE ON OKINAWA—Lieut.-Gen. Simon Bolivar Buckner, Jr., commander of the U.S. Tenth army, is shown (left) on a rocky observation post on Okinawa as he watched progress of his troops moving up on Naha, capital of the island. With Gen. Buckner are Major-General Lemuel C. Shepherd, commander of the Sixth Marine division (centre), and Brigadier-General William T. Clement, his assistant commander.

Thrilling War Service

British Liner Queen Mary Has Done A Remarkable Job

When the full log of the Queen Mary is disclosed it will contain some thrilling episodes in the war-torn career of the regal lady of the seas. She almost capsized in one severe winter storm, experienced a number of narrow escapes from German U-boats, and now the world is told of how she collided with and sank a British cruiser that was escorting her as she carried more than 15,000 American troops. There was a lamentable loss of life among the crew of the cruiser, but the fact that the disaster was not even more tragic appears to have been due to the liner's stout build. That she could survive such a terrific impact, without her forward bulkheads crumpling is extraordinary and a tribute to the men who fashioned her.

To save time keep needles threaded in several different colors whenever they may be needed for quick repairs.

Lloyd's of London gets its name from an English coffee house kept by Edward Lloyd in Tower Street in the 17th century.

MEMBER OF PARLIAMENT PROVED A POINT—Taking issue with a British minister of works statement that the laying of 200 bricks was a fair day's work for a bricklayer, Sir Harry Selley, 73-year-old member of the parliament, bet Parliamentary Secretary George Hicks that he would lay that many bricks in an hour, making a forfeit to charity for every brick short if he failed. He didn't fail. He laid 'em neatly in just 58 minutes and even stopped to drink a glass of beer. Above the venerable legislator is shown at work, derby and all.

Some Details Of Britain's War Achievements In Respect To Salvage And Harbor Clearance

"BRITAIN will have, on the termination of hostilities, the finest and largest fleet of salvage ships and crafts available anywhere, a great amount of special equipment and surplus skilled and experienced salvage personnel," declared Captain J. B. Pollard, Chief Technical Officer of the Salvage Department of the British Admiralty, in a recent lecture to the Royal United Service Institution. Following are some details of Britain's war achievements in salvage and harbor clearance.

The extent of the work of the Admiralty's salvage and rescue tug service is indicated by the fact that from September, 1939, to December, 1944, these organizations salvaged over 5,000,000 tons of merchant shipping, that is a tonnage about equal to new building of merchant ships in the United Kingdom in the same period; the importance of this work is underlined by the losses of British merchant shipping up to the end of 1943 (11,500,000 gross tons compared with a pre-war total tonnage for the merchant marine of 17,500,000). The necessity for providing salvage services all over the world wherever Allied shipping is exposed to enemy attack quickly brought into being a salvage organization with ships and bases in the United Kingdom, Iceland, the Faroes, the Mediterranean, Africa, and India. Its scope is now being extended also to the Pacific.

Each ship or base is manned by divers, riggers, shipwrights, mechanics, equipped with all kinds of salvage plant and engineering stores, making each an independent unit capable of dealing promptly and efficiently with any salvage job arising, whether of an ice-berged ship in the Arctic or of a vessel helpless in the Indian ocean. The differing conditions from place to place necessitated the provision of differing equipment, e.g. in the United Kingdom the lifting and removal of wrecks is assisted by tides, whereas in the tideless Mediterranean entirely different equipment is required. In British coastal waters a temporary timber patch over damaged side plates is sufficient, but for a voyage from Iceland or North Africa to a dry dock in the United Kingdom something more substantial is needed.

Immediately facilities were available the Admiralty proceeded to build two types of salvage tug (coast-going and coastal), three types of dumb-lifting lighter (or camel). Experience has shown that all these are admirably adapted to the work. In 1939 the new British designs for portable salvage pumps were produced, embodying the latest improvements in internal combustion engines and pumping machinery.

A new type of submersible pump for draining, driven by a portable air compressor which delivers compressed air at 100 pounds pressure, providing and restoring buoyancy to the ships compartments, works pneumatic tools above and below the water, and portable air winches: it can be harnessed to the ships' steam winches. A new electric Oxyarc cutting torch and electric arc process for under-water welding, the Cox gun, submerged belt-driven gun are some of Britain's contributions to salvage equipment. (The Cox gun can also be used to fire a hollow bolt into the side of a compartment for the introduction of compressed air and is far quicker than the ordinary pneumatic drill for punching holes. It is extensively used for the repair of tanks and other armored vehicles in the field.)

The operation of these many new types of equipment has made it necessary for British divers to be more highly skilled and trained than ever before.

From the outbreak of war, the development of modern aircraft made it comparatively easy for the enemy to block the fairways of British ports by sinking ships by bombs or mines. During the London blitz of 1940 the Admiralty salvage department carried out much speedy work under difficult conditions, to keep the London docks clear of such obstructions.

Similarly, elsewhere at one British port, in 1941, nine sunk vessels were raised in 13 days. But from 1912 onwards, the harbor clearance work of the British Navy came forward into the main picture of war operations as the Germans (described by the late Admiral Ramsey as the best port demolishers in the world) did all in their power to deny the Allies the use of port facilities in North Africa, Sicily, Italy, the south of France, and northwest Europe. At Tripoli, 11 ships of one to five thousand tons were sunk in a line across the harbor entrance, with a tangled mass of wrecks of smaller craft and cranes barges piled on top. It was almost impossible to get a motor boat through. But first one of the block ships was disintegrated with

skillfully placed explosive charges. Five days after the capture of the port, landing craft could make the passage. On the eighth day there was a passage 14 feet deep; on the 15th day a vessel of 15,000 tons passed safely through a passage created by dragging the ships on either side of the central gap around on their keels like swing doors. At Marseilles, where eight large ships were sunk in the channel, Liberty ships passed through 15 days after the capture. At Naples, salvage parties had to lift 170 wrecks from all over the harbor. In north-western Europe, by December, 1944, ports wrecked by the enemy, but cleared by Navy port parties included, Havre, Cherbourg, Rouen, Dieppe, Boulogne, Calais and Ostend.

In addition, Antwerp had been brought into use, following the British and Canadian armies clearing the Scheldt and the work of nearly 200 minisweepers of the Royal Navy carrying out one of the biggest minisweeping jobs ever undertaken.

The above remarkable series of achievements has given British salvage personnel an unrivalled experience which, with modern equipment developed for war needs, makes Britain able to undertake any kind of post-war marine salvage work, anywhere in the world.

Aviation's Future

Canada To Become A Crossroads Of Great Importance

With the speed of air travel, the world is becoming one neighborhood, giving us a new measure of distance in terms of hours, not miles, and having a profound effect on Canada's place in international aviation." W. F. English, vice-president of Trans-Canada Air Lines, said in an address to the Mid-Canada Air Conference here, attended by leaders in the aviation industry from Canada and the United States. "A trans-Atlantic crossing from Montreal to the United Kingdom today requires less than 12 hours," said Mr. English, "but this time will be considerably reduced by the aircraft of the future."

Mr. English told his listeners that the war has had and will continue to have a profound influence in the shaping of policy, adding that the world today is interested in aviation as never before, with the public imagination focused on its possibilities, and no nation wants to be out of the picture.

D. R. MacLaren, T.C.A. superintendent of passenger service, also spoke and said that in the global network of future aviation, Canada, by reason of its position on the globe, "is destined to become a crossroads of tremendous strategic importance."

Transition Gradual

From Carbon Inks Of Eastern Type Into Modern Product

Writing ink, says the Brandon Sun, is one of the manufactures in daily use today which reached a high degree of perfection long before our time. The use of ink dates back to the era following the invention of writing. The earliest writing ink consisted of a mixture of lampblack with a solution of glue and gum. The transition from carbon inks of the Eastern type into the modern inks took place very gradually. Pliny, Vitruvius and other classical authors mention writing inks, and old manuscripts show that its manufacture had reached a high degree of perfection in the Middle Ages. Most of the ink sold in Canada is manufactured in the Dominion, the output in 1943 amounting to 666,000 pounds valued at \$412,000.

FAST CONSTRUCTION

Permanent brick houses are being erected in Britain in half a day by a new engineering process; in course of these bricks are pressed into a steel mould and concrete poured over the back of them; when dry the brick panel is hoisted into position by machinery.

A GOOD LAW

Incitement to national, racial and religious hatred will be a punishable offence in Yugoslavia under a new law passed by the anti-Fascist assembly. A Belgrade despatch quoted by Moscow radio reported.

Distaff Side Of Airline Honoured

Five years service with Trans-Canada Air Lines, the longest period of any feminine employee of the company, was rewarded recently when Miss Helen Brown, passenger agent at Lethbridge, Alta., was presented with a five-year service pin on behalf of the company.

Miss Brown was born and educated in Ottawa and graduated in nursing from the Civic Hospital there, in 1938. She followed the nursing profession for two years before joining T.C.A. as a stewardess. In that capacity, she served between Windsor, Toronto, Winnipeg, Lethbridge, and Vancouver until 1942 when she became passenger agent at Lethbridge.

Timed to coincide with the presentation, a teletype message from the Vice-President of Trans-Canada Air Lines, W. F. English, was read to Miss Brown by E. W. Stull, Pacific Superintendent of T.C.A., who made the presentation—"Please convey to Miss H. Brown the congratulations of the entire company as the first female member of T.C.A. to complete five years of continuous service. She not only achieves personal distinction but proves that it has taken more than mere males to build the air line." Miss Brown is shown in the above picture receiving her five-year service pin and gifts from Mr. Stull.

CANADIAN COST OF LIVING IN TWO WARS

LAST PRE-WAR MONTH = 100

WARTIME INCREASES IN LIVING COSTS OVER AVERAGE FOR FIRST SIX MONTHS OF 1939

Stability of prices is no accident. It is the result of an organized and co-ordinated effort on part of the Canadian people. This effort to date has been sufficient to control enormous inflationary pressures. These pressures are still very great. The record of the last war shows that the danger of inflation is bound to continue after the end of hostilities and that the people of Canada should continue their undivided fight to keep prices under control.

Records of the Wartime Prices and Trade Board amply demonstrate that inflation can be prevented so long as the people of Canada give determined support to stabilization measures. Under the leadership of Donald Gordon, the chairman of the Prices Board, Canadians have shown world leadership in the control of prices. As the smaller of the two charts (above) reveal. That chart shows

NEW KIND OF BULLET

Invention of bullets that disintegrate on striking a target, enabling military forces to train realistically with "live" ammunition, was reported by The Evening Standard's air correspondent.

Effective Methods Adopted For The Control And Eradication Of Persistent Perennial Weeds

Perennial weeds, those that propagate and spread by both seed and root, or underground stem—after once becoming established are difficult to eradicate, says H. E. Wood, a member of the National Weed Committee. Perennial weeds, from the standpoint of control, are divided into two groups: One is termed "deep-rooted and persistent". Belonging to this group are Leafy Spurge, Field Bindweed, Hoary Cress, Russian Knapweed, Bladder Campion, and Poverty Weed.

In Western Canada, in certain districts, one or more of these weeds have become serious problems. These weeds cannot be controlled by even very good farming operations. Control, and often eradication, can be obtained by following special methods.

The cheapest and most effective methods of eradicating any one of the deep-rooted persistent perennial weeds in small and scattered patches is by the application of chemical. Sodium chlorate or Attilacide, the trade name, has been in use for many years and is regarded as the most effective of the several chemicals in use.

Generally speaking, the use of chemical will be found more effective if placed in the hands of trained officials with proper equipment, rather than to depend upon an individual farmer to look after his own problem. In the Province of Manitoba, several municipalities are grouped together as Weed Control Units. Each Unit with its own equipment, employs a spray crew that does a chemical treatment within the Unit. Success in eradicating small and scattered patches of these weeds has been attained by this plan.

When extensive infestations of deep-rooted persistent perennial weeds are met with, control by chemical becomes too expensive. If the land is of sufficient worth to merit intensive cultivation, this method of control should be followed. If, however, the soil is very poor, or of such a nature as to blow easily, cultivation should not be tried.

In adopting a program of "intensive cultivation" the underlying principle of thorough work, regularity of operations and cultivation carried over a sufficiently long period, must be observed. Under certain conditions, especially if soil drifting becomes a hazard, it may be advisable after one season's cultivation to seed to a quick growing crop such as barley. The field should be cultivated immediately before the crop is seeded. Again, immediately after the crop is harvested, cultivation should commence and continue until freeze-up and through the following year. Fall rye may also be used where drifting is likely to be a problem during the winter.

Control of deep-rooted perennial weeds on marginal and sub-marginal land presents a difficult problem. Mowing to prevent seed setting should be encouraged. Pasturing, especially with sheep, offers possibilities. Where leafy spurge has been heavily pastured with sheep some excellent results have been noted. Seeding such lands to grass and legumes appears advantageous. Grasses with aggressive root systems, such as a crested wheat grass, appear to be able to compete with even the most persistent deep-rooted perennial weeds.

Cannot Be Moved

Goering's Bathing Will Never Be Carried Away As Souvenir

American soldiers investigating the Berchtesgaden hideouts of the fallen Nazi leaders came across one item in portly Hermann Goering's villa which could not be carried away as a souvenir. It was Goering's bathtub. Large enough to accommodate two men comfortably, it was flown down from Berlin in one of the Luftwaffe's bombers. Too big to go through the doors or the windows of the house, the tub had to be hoisted in with a crane out of a wall had been torn after—New York Herald Tribune.

RECORD LAUNCHINGS

From Sept. 3, 1939, to March 31, 1945, 208 merchant vessels, of 1,534,216 tons, were launched from the shipbuilding yards on the river Clyde, Scotland. The total number of merchant ships launched on the Clyde and at Glasgow yards from the beginning of the war to March 31, 1945, is given as 456 vessels, of an aggregate tonnage of 2,167,888.

SUB COMMANDER IN CHIEF

Admiral Heye, commander in chief of German midget submarines, has been arrested by the British naval party. The Daily Mail special correspondent at Kiel reported. Heye was found in a farmhouse together with six strong boxes full of gold used by him to pay his naval staff in all parts of Europe.

NORMAN A. MacMILLAN who has been appointed general counsel with jurisdiction over the Law Department of the Canadian National Railways and subsidiaries, succeeding R. H. M. Temple, K.C., who becomes consulting counsel. A graduate in Arts and Law from the University of Manitoba, Mr. MacMillan joined the Canadian National Railways in 1937 as a solicitor in Winnipeg and, in 1943, was appointed assistant general solicitor at Montreal.

Caused By Bombs

Women In Britain Losing Their Hair Due To Shock

Although they kept their heads under air attack, some British women are finding great difficulty keeping their hair. As a result, there is a boom in the sale of wigs, toupees and artificial curls to women and girls whose hair is falling out due to shock caused by the V-bombs and the earlier blitzes on England.

All the leading wigmakers have had their stocks booked up until the end of the year. Priority is being given to genuine V-bomb victims in preference to women who wear wigs just for vanity.

A doctor stated that the medical profession does not know the reason why people lose their hair through shock, but in most cases only women are affected.

Shower Linens

by Alice Brooks

Just what you're been looking for—that bridal shower gift! Puppy motifs are quickly embroidered on towels in easy-to-do stitches. The gay canine romance may be used on all kinds of kitchen linen. Pattern 7043 contains 6 motifs averaging 5 1/2 x 8 1/2 inches. To obtain this pattern and twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number. "Because of the slowness of the mails delivery of our pattern may take a few days longer than usual."

LOSS AVENGED

The Hamilton Spectator says the sinking of a Japanese cruiser of 10,000 tons off the Malay peninsula by British naval and air units helps to avenge the loss of the Prince of Wales and the Repulse in those waters earlier in this war.

In architecture a colonnade is a row of columns; if it completely surrounds a building it is known as a peristyle.

WORLD HAPPENINGS
BRIEFLY TOLD

Bristol, England, is to set aside 50 per cent. of its temporary housing accommodation for members of the forces now on the waiting list.

The Lublin radio says that within a short time 500,000 Poles will settle in the East Prussian area of the Masurian lakes.

Between March, 1944, and February, 1945, 18,794 men were directed by the Ministry of Labor to underground coal mining in Britain.

Lloyd's of London issued its "shipping intelligence", suspended during the war for security reasons, for the first time in nearly six years.

The Dominion Bureau of Statistics shows that U.S. visitors to Canada in 1944 spent \$108,000,000, a 25 per cent. increase over 1943.

The Chinese foreign office at Chungking announced that China and Argentina have agreed to establish formal diplomatic relations and ambassadors will be exchanged shortly.

Trapped in three government-developed areas of Manitoba, a \$750,000 crop of muskrat pelts was offered for sale at public auction in Winnipeg.

A \$1,000,000 laboratory will be erected in Ottawa in the post-war period to house laboratories of the department of health and welfare and further scientific research in the Dominion, Health Minister Claxton announced.

The Opobo chiefs of Nigeria have been paid the \$50,590 promised by the British government in 1939 if the heirs and successors of Chief Jaja kept the peace. Jaja was deported in that year for acts of oppression against his own people.

Experiment Ended

Fagan City Hitler Started Is Just Another Failure

Hitler's "strength" through joy automobile city, a mile from Fallersleben, now is a picture of a vast dream shattered.

Here Hitler started what he boasted would become the world's largest automobile plant, and he made the new city an experiment in attempting to eradicate Christianity.

Hitler promised that every worker would be in a position to become the owner of an air-cooled, four-cylinder, 24-horsepower, five-seater flivver, beginning in the last months of 1938. The price for this people's car was fixed at 990 marks (about \$396), and a special workwagon savings bank was started into which workers could pay as little as five marks monthly.

War broke out at the time fixed by Hitler for delivery of the first cars. No worker received his promised car, and his savings account was credited to the war loan. Only a few production units are intact enough to make a few cars daily for Allied military purposes.

Germany's youngest city also is doomed. Here Hitler was determined that citizens and especially children should be reared in Nazi paganism. No churches were permitted, but instead a community house was erected as the city's centre of "religious activities". There, for instance, the ceremony of "name-giving" as a substitute for Christian baptism was held.

That experiment also is ended.

A gale is a wind of considerable power, stronger than a breeze, but not severe enough to be called a storm.

Appointed To Senate

H-Captain Brewer Robinson was carrying on as usual with his duties as Acting Overseas Manager of the Canadian Legion, when he heard of his appointment to the Canadian Senate.

The Captain's reaction was un-demonstrative. "It is nice," he said, "to know that I have friends at home."

Senator Robinson has many friends on both sides of the ocean. He has been active politically in his native province of Prince Edward Island a good part of his life, having held the mayor's chair in Summerside, as well as a seat in the P.E.I. Legislature. He served in France from 1915 to 1919 with the 2nd Heavy Battery during the last war, and during the years of peace associated himself extensively with the affairs of the Canadian Legion.

The Senator came overseas as Auxiliary Supervisor attached to the Cape Breton Highlanders, in the 5th

Division. After serving with that unit in the United Kingdom, he transferred to the Personal Service Dept. of the Canadian Legion, in London. Since the return of Mr. Baeten to Canada a short while ago, Senator Robinson has been acting as Overseas Manager for the Legion.

Senator Robinson feels that he will take with him to the Upper Chamber a considerable understanding of soldiers' problems, and how to deal with them. He fought with them in the last war, and has served with them well in this. He is convinced that the plans for the rehabilitation of Canadian servicemen and women far surpass those of any other country. The Senator's wife is at present working in a blood clinic in Montreal, but after the war they will probably divide their time between Ottawa and Summerside, where he is associated with the P.E.I. Fur Pool Limited, a company formed by the breeders of silver fox.

A Striking Tribute

U.S. General Bears Witness To Churchill's Grandeur Of Leadership

General George Marshall, United States Chief of Staff, in a message to Prime Minister Churchill, published in London, paid tribute to Mr. Churchill's "vast contribution to the re-establishment of peace in Europe." Gen. Marshall said: "It has been a long and terrible road for you, sir, since the fall of France. I can bear personal witness to the grandeur of your leadership."

"There will always be in my mind the breadth of your vision, and your generous attitude in effecting the co-ordination and crystallization of our combined plans. Personally I will cherish the friendship and confidence you gave me during the seemingly slow and tortuous progress to the most complete victory in modern history."

Mr. Churchill, in reply, declared: "I am deeply grateful to you for the message with which you have honored me although it is far beyond my deserts."

POULTRY FROM CANADA

Canada has already supplied in 1945 some 4,500,000 pounds of dressed poultry to the United States army as part of a 30,000,000 pounds commitment on a United States government contract, the special products board announced at Ottawa.

"E" is the most frequently used small letter in English, "g" is the most frequently used capital letter.

About U-Boats

The Submarine Still Remains A Terrible Weapon

Germany ended the war with her submarine fleet almost as helpless as the Luftwaffe. It was beaten in many a battle by sea and land. At sea more than 500 enemy U-boats were destroyed. On land Allied forces closed relentlessly on the bases from which the wolf-packs issued. Isolated merchant vessels were being sunk even as V-E Day dawned. But the final undersea "blitz" with which Admiral Donitz planned to paralyze our Atlantic shipping was among the battles never fought. It was crushed before it got well started.

Nevertheless, Germany still had from 450 to 500 submarines when she surrendered. Of these 150 to 170 were in "operational status", though only about 50 or 60 were at sea. Virtually all were highly efficient craft, new 1,600-tonners fitted with the "schmorkel breathing mast" to permit submerged battery-charging and apparatus to baffle our detection devices. Only 41 of the cruising fleet have surrendered thus far; a few may have escaped to Japan; others were probably lost in actions not definitely counted as victories.

Except for a few Japanese craft which penetrated the Atlantic and those now operating in the Pacific, the submarine is no longer a menace. But it remains one of the most terrible weapons ever devised by man.

The submarine cannot successfully fight the submarine. No ship that floats can stand against its deadly torpedoes. No specific answer to it has yet been found. It was only by a combination of defenses, in the ships, in the air, on the surface and beneath the surface, and a pooling of Allied material and strategic resources, that we were able to overcome it.

For a time, especially in the dark days of 1943, enemy U-boats seemed to be winning the war. All told, Germany launched more than a thousand of them. How many millions of shipping they sent to the bottom (two million tons in the first eleven months of the war, before they reached the height of their power) has never been fully revealed. Beat them we did, but at a cost of life and treasure the world will never forget.—New York Times.

The Metropolitan Museum of Art in New York City displays triangular loaves of bread, baked in ancient times 3,500 years ago.

Chinese is spoken by some 400,000,000 people if all the various dialects are included.

THIS CURIOUS WORLD

By William Ferguson

ANSWER: Finland. Popular trees are great water drinkers and, when necessary, they send their roots down considerable depths to reach it, and even force them into the joints of the sewers.

REG'LAR FELLERS—A Beeline

Poultry Pointers

Sanitation Plays An Important Part In Disease Prevention

Sanitation plays an important role in disease prevention in poultry flocks. It entails the provision and maintenance of clean, healthful surroundings for chicks, growing birds, and the laying flock. Upon sanitary measures also depends the success with which birds are protected from lice and mites, and from polluted soil harboring worm eggs and germs.

The conditions under which the young birds are kept during the growing period influence the death rate in the flock during the winter and ensuing months. When kept on polluted soil, the birds are almost certain to be infested with intestinal worms as well as with infections of diseases contracted and spread by previous generations of poultry. Due to the dangers of rearing young stock on ground that has been in constant use for poultry, it is a good plan, states R. M. Hopper, Dominion Experimental Farm, Brandon, Man., to enclose the growing stock on a fresh piece of ground that has not been used for poultry for at least two years. The soil in the immediate vicinity of the farm buildings is the most likely to be polluted, and is consequently the most dangerous area for the young stock. The provision of an abundance of fresh pasture on clean ground for the growing birds is the first step toward reducing poultry diseases.

Other sanitary precautions that should be taken are to clean and disinfect the poultry houses thoroughly at least once a year, preferably immediately before the pullets are housed in the autumn; and to cull promptly all sickly and ailing birds and bury deeply or burn the carcasses. Failure to dispose of carcasses of diseased birds is particularly dangerous.

HIGH VOLTAGE EQUIPMENT

Million-volt radiography may be used for the first time in cancer research when high-voltage equipment is released for civilian use, H. C. Mergamen, director of industrial laboratories at the University of Rochester, N.Y., said at the annual meeting of the Canadian Society of Radiological Technicians.

Pascal, when 19 years old in 1650, invented a calculating machine.

OUR COMPLETE SHORT STORY—

Jealous Husband

— By —
MARCIA DAUGHTERY

McClure Newspaper Syndicate

"Tommy Anders going to the dinner tonight?"

Iris stared unhappily at her husband's grim profile as he let in the clutch and the sedan shot ahead. "I don't know."

"Lewis Alerd?"

"Oh, Gregg, what difference does it make? No matter who the extra man is, you'll be jealous of him. Sometimes I think you'd suspect me of making eyes at the Hunchback of Notre Dame."

Gregg parked and slid under the wheel leaving the motor running. "Going to get some cigarettes and leave you to dream about . . ." his smile was tight-lipped. " . . . whoever the guy is. And if I ever catch you with him, I'll blow his head off!" Relaxing with a sigh against the seat back Iris thought, Gregg is getting psychopathic. I wonder how much longer I can stand this jealousy business.

She closed her eyes when she heard his brisk step on the street, and remained possum-lidded as they charged down the highway, turned the corner on whining tires and shot westward. "There's no sense in driving so fast," she complained.

"Keep your trap shut," ordered a strange voice.

Iris sat up as her heart leaped into the top of her head. The man at the wheel was young—not over 25—and there were hungry hollows be-

neath his cheek bones. A pulse was beating in his right temple; his skin was as taut as the head line, and below that the darkness of stubble turned cheeks and chin a muddy gray.

"What are you going to do with me?" Iris asked.

"I'm going to take you out the Speedway and dump you. You can walk home with your head in the sand."

The Speedway traversed the worst alkali section in the state. There would be a farmhouse for miles. Iris could feel every individual hair on her head as if she were a cushion sprouting pins.

Then her kidnapper made a most astonishing statement. "I'm sorry to scare you, ma'am, but I had to have this car."

She couldn't speak.

"Had soup day before yesterday," he jerked. "A dish of wormy cereal the day before. I've a wife and kid, and they gotta eat. Not eligible for relief because I own half interest in a gas shovel."

Iris turned in the seat as the man stopped. "Listen, when I get to a telephone I'll have to notify the police. You'll be stopped within two or three hours. But if you want to make an honest living, I know a way."

Something about the eloquent look of his eyes reminded Iris of a beaten dog that hears a friendly voice. "You wouldn't be pulling a fast one?" he gasped.

"No. This is sincere, my husband, who is chairman of the grounds committee at the country club, said they should get somebody to drain the lake and reclaim all the lead shot that has accumulated in the sludge. The shot is worth sixty-five dollars a ton, and after all these years of clay pigeon shooting there ought to be a great deal. Gregg heard about a club in the east that did it, and was bowled over by the profits. The club would want twenty per cent. of the in-

come. But you have a shovel, and it seems to me . . ."

Her companion's lower lip hung lax. "Maybe it's a trap," he gritted, "but I'm game to find out. If it's O.K. with you, I'd like to talk to your husband tonight."

To prove his belief in her the man added, "You drive back to town." Stepping into the road, he circled the car and got in on the other side. "See, I gave you a chance to leave me if you were just fast-talking yourself out of a tough spot," he explained.

As they headed cityward, Iris recalled Gregg's final statement. "If I ever catch you with him, I'll blow his head off."

If Gregg saw her with this stranger he would shoot first and ask questions afterwards. "Try to believe in me, as I've already proved my belief in you," she began. Swiftly she explained her fear.

The man scrutinized her. "Is your old man right? Have you been cheating?" No use lying to me, you know."

Iris' eyes met his. "No," she said, "there's never been any man for me but Gregg. I don't think there ever will be, because I happen to adore the big, lumbering, suspicious lug."

"That's good enough for me," said her companion. "You give me your husband's name and address and I'll show up at his office tomorrow morning. That will give you time to explain things to him, and if he's half as well as you are, I'm the luckiest sucker on earth."

"His cards are in that side compartment."

He slipped one into his pocket. "You can let me out at the next corner, ma'am. Tomorrow morning is a deal."

At nine he walked into Gregg's office.

"If you think you're going to get paid . . ." bellowed Gregg.

The man grinned. "I don't want your dirty money. You're going to give me a job to earn my cash honestly. I found out what you wanted to know without dumping her. That woman is four-square, and no mistake, and if you don't give me the lake contract I'll tell her that you figured her alleged boy friend was following your car last night. Also that you suspected they were going to a private party after she dropped you at the club, and you hired me to find out. Give, big shot—give!"

2-Way Wraparound

4726
3225
20-48

By ANNE ADAMS

Double front gives double service! Pattern 4726 wraps to left or right, adjustable to your waistline. Cool coverall or all-purpose frock.

Pattern 4726 comes in Misses' and Women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48. Size 36, 3 1/2 yds. 35-1/2 in. collar.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

More Important Now

Mail For Armed Forces Should Carry Complete Return Address

A complete return address on all mail for the armed forces is more important than ever at the present time. The movement of members of the armed forces will increase rather than diminish with personnel changing units, returning to Canada or proceeding from Canada overseas. All these movements complicate the delivery of their mail. Under those circumstances the postal authorities urge that a complete return address be placed on all mail to ensure its prompt return if undeliverable.

North America's tallest bird is the sandhill crane. When standing erect, the male is about as tall as the average man.

Who ever heard of a bonspiel in July? Believed to be the first ever held in Canada, such a mid-summer event is scheduled for Nelson, B.C. The spiel will last four or five days, limited to a 5-rink entry with for more events. The Nelson Civic Centre is co-operating with the Curling Club in promoting the bonspiel. Artificial ice, of course, but it should attract lots of attention.

The Rosetown Eagle in Saskatchewan makes this comment: "The sooner transportation to the United States can be found for those 24,000 English brides of American fighting men, the better. A shipload of English girls is worth more than their weight in diplomats in cementing the bond of friendship between the people of the United States and Great Britain."

This is not built: An auction sale of animals by Claude Gallinger of Tofteld, Alta., held at Edmonton, saw cattlemen from Saskatchewan, Alberta and the U.S. pay on the average \$1700 each for 23 bulls, \$1200 each for 11 heifers. Top price was \$4300 for a yearling bull, a top heifer brought \$2050.

Aye, well spoken: John Pindermost of Kamloops, B.C., speaking at a Chamber of Commerce meeting and Salmon Arm, said: "There are too many 'umbians', British Columbians, Manitobians, Ontariobians and not enough Canadians in Canada. In the critical days to come, Canada will need all the Canadians she can get."

Tall stories now come from Co-bourg, Ont., because the Industrial Relations Committee of the Chamber of Commerce has helped to make H. Edgar of this Co-borough locate his new factory in Co-bourg. The new industry will manufacture fishing hooks, split rings, swivels and reels in the first unit of operation. It's a post-war industry, will employ 30. Such are springing up all over Canada in smaller centres.

V-E Day lines culled at random from the weekly press: There can be no question that our victory of today was divine intervention. . . . The Lord hath done great things for us; whereof we are glad. . . . Management and labor leaders have a difficult, critical job that requires the securing of good sense, understanding and well-thought out policies. . . . If we can learn to live together and work together in the interests of everyone in peace as in war—years spent in danger were not in vain. . . . Meanwhile Canada has an important job in saving thousands from starvation by sending across the Atlantic all possible food supplies. . . . The expressions will vary in word and form, but the spirit of gratitude will be universal. . . . The annals of Time know no brighter day than this.

Fine tribute: At Baras Corners, N.S., Deacon Richard Delong, at 81, finished 60 years as Sunday school superintendent of the United Baptist church. On a recent Sunday they held a special anniversary service for the deacon, with a fine original program suitable to the occasion.

Nova Scotia's assault with interest the development of the proposed Petrolite power project. The report of the engineers is to be on tap any time now. Premier Jones has stated the cost of development might be as low as \$97 per horsepower, which would make it cheapest in the world. A proposed tidal project in Great Britain is to cost \$680 per horsepower.

Bits of Canada: Announcement of the death of the first soldier from Gore's Landing, Ont., to die in World War II came ironically at the conclusion of the V-E Day church service attended by all in the village; he was Roy Thackeray, 20.

At Belleville, Ont., a woman walked into a butcher shop, asked for a roast in the refrigerator; told it was sold, whipped out a gun and got it. . . . At Beverley, Sask., Tony Scherzer's hillyogair climbed in the cab of his tractor, drank two gallons of purple gas, and passed out forever. . . . At Bowmanville, Ont., a marriage united Dorothy Cook and George Merton, Ontario again holds the spotlight. At Newmarket, two soldiers were convicted for breaking into a grocery store. One of them, minus a tooth, took a bite on a piece of cheese, later was traced through this. . . . The Alaska Highway News gleams over the story that Wynne "Scotty" Smith, who hails from Glasgow, sat down at the Pomeroy Cafe, ordered two dozen fried fish eggs and polished them off at one sitting.

Outstandingly Good "SALADA" TEA

Wise Choice OF BUSY HOUSEWIVES

For meals-in-a-hurry at any time of day—breakfast, lunch, between-meal snacks—clever housewives rely on Kellogg's ready-to-eat cereals. They're ready to serve in 30 seconds . . . need no milking or cooking. Easy to digest. Economical, too!

Peace Garden

Memorial To A Great President And Good Neighbor

The Peace Garden seems a most suitable place for a memorial to a great president and a Good Neighbor of Canada. Situated in the Turtle Mountains of Manitoba and North Dakota, the Peace Garden is close to the geographic centre of the continent, and has been developed by citizens of both Canada and the United States. It was designed as a memorial to the long-standing friendship between the two countries and as a pledge to the continuation of the harmony which has endured for more than a century.

Certainly the International Peace Garden seems an ideal location for the building of a lasting tribute to the man who above all others contributed to the deepening and broadening of that harmony. — Winnipeg Tribune.

Catgut for the strings of violins never comes from cats, according to the Encyclopedia Britannica. It is simply to wrap corn flakes in a clean towel, making sure that all ends of the towel are carefully tucked in, and supply the rolling pin with a light hand. It is the work of seconds to produce crumbs of just the proper fineness.

The light from the sun reaches our earth in 499 seconds.

RECIPES

MEAT STRETCHING EXERCISE

One, two, three—STRETCH! It isn't the newest reducing exercise—just the routine of a thrifty housewife planning this week's meals. For stretching budgets, without sacrificing wholesome goodness and appetite appeal to those three-times-daily meals, is one of the basic mental jobs of home-makers today.

An important culinary trick for stretching the budget—and making thrifty main dishes even more inspiring to the appetite—is to use crisp cereal, that familiar breakfast standby, in a wide variety of main dish specialties, as a delicious extender of protein foods.

The mild, but distinctive flavor of these crisp flakes of corn proves a perfect flavor-complement for all sorts of meats and fish—for meat and wolf leftovers too. The use of prepared cereal as an extender for meat dishes is a time-saver for busy house-makers, for corn flakes, crisp and golden brown, roll easily to crumbs of any desired fineness.

A tip for good cooks is that the simplest method of preparing crumbs for meat leaves or any cooked dish, is simply to wrap corn flakes in a clean towel, making sure that all ends of the towel are carefully tucked in, and supply the rolling pin with a light hand. It is the work of seconds to produce crumbs of just the proper fineness.

If everybody and everything irritate you, something should be done. Frinstance—perhaps the caffeine in tea or coffee is the cause. Perhaps you should drink Postum instead!

Postum is a grand drink! Not like tea, not like coffee, but so downright delicious you'll love it just for its own sake. And Postum contains no caffeine, nor any other drug to affect heart, nerves or digestion. Made instantly in the cup, it costs less than 1¢ a serving. Try Postum today!

A Product of General Foods

Firestone

THE ONLY SYNTHETIC RUBBER TIRE

PROVED ON THE SPEEDWAY AT 100 MILES PER HOUR

CAR owners have been wondering just how safe synthetic rubber tires are—just how much mileage they will give. Firestone decided to put its tires to the supreme test. So a race car was equipped with regular, stock Firestone Synthetic Rubber Tires, the same as you can buy for your car, and raced for 500 miles around the Indianapolis Speedway under American Automobile Association supervision.

Wilbur Shaw, famous three-time winner of the Indianapolis Sweepstakes, volunteered to make the run. And he averaged 100.24 miles an hour, hitting more than 155 miles an hour on the straightaways! Imagine the punishment those tires took as they pounded over the rough brick and grinding asphalt—equal to 50,000 miles of ordinary driving! Yet, in this grueling tire-torturing test, not a skid or blowout occurred.

Remember this fact when you get permission to buy new tires—Firestone are the only tires made that are safely proved on the speedway for your protection on the highway.

WARNING—The tire salesman who tells you that synthetic tires are not as good as regular tires is not getting better mileage from his own tires. The only kind of keeping safe on the road is to serve warning signs. Firestone tires are safe, simple, yet fundamentally sound. They are the only tires which have passed so many tests. Your dealer will help you see him today.
